SPECIAL ORDER SIMPSON DOOR

Simpson Door takes great pride in providing special order products with competitive pricing and short lead-times that you can count on. These are things that must happen in order for a construction project to be able to run smooth and efficiently. One of the ways that they achieve this is by entering ABS orders into their system within 24 hours from the time that ABS places their order. Once the order is in their system and the material cut lists are created, to make a change can only cause confusion and effect the efficiency of the plant. Because of these goals, they **do not** allow any changes to a special order once it is in their system. ABS needs to apply the same rules in that once we have placed the order with Simpson it **cannot** be changed or canceled. Any request to cancel an order **must** be done by phone (not by fax) to insure that contact has been made, and from there it will be determined whether or not the cancellation will be allowed. ABS will provide a faxed confirmation to their customer to confirm that the material is on order and to provide an approximate ship date. If an error is found on the confirmation, the customer must contact ABS immediately who will in turn contact Simpson and attempt to make a change. Depending on where the order is in Simpson's system will determine whether or not a change can be made.
